

SIDDARTHA MISHRA

AI + Full-Stack Developer | LLMs | RAG | AI Agents | Backend Systems

Gwalior, Madhya Pradesh, India | sidd23mishra@gmail.com | +91-9259487792 | GitHub: siddarthasoul | LinkedIn: siddarthamishra

PROFESSIONAL SUMMARY

Full-Stack AI Developer specializing in LLM applications, RAG pipelines, AI agents, and backend systems. Experienced in building AI applications with backend APIs, vector retrieval, document-processing pipelines, tool-based workflows, and real-time AI integrations.

TECHNICAL SKILLS

Languages:	C++, Python, TypeScript, JavaScript, SQL
AI / Machine Learning:	PyTorch, NumPy, Transformers, LLMs, RAG, Embeddings, Vector Search, Pydantic, Agent Orchestration
LLM / AI Infrastructure:	Ollama, Qdrant, FAISS, Hugging Face, Google Gemini
Backend / Frontend:	FastAPI, Node.js, Express.js, REST APIs, WebSockets, JWT, MongoDB, Redis, React, Next.js, Tailwind CSS
Data / Systems:	PostgreSQL, Docker, Linux, Git, GitHub

SELECTED PROJECTS

SOUL AI — AI Learning Assistant

FastAPI | Python | Qdrant | LLM APIs | WebSockets | RAG | Vector Search

- Built an AI learning assistant combining LLMs, Retrieval-Augmented Generation (RAG), and vector search for technical knowledge retrieval.
- Designed conversational question-answering workflows with a FastAPI backend and WebSocket-based streaming responses.
- Implemented document retrieval using Qdrant to provide context-aware responses.

AI Coding Agent

Python | Pydantic | LLMs | Agent Orchestration | Task State | Tool Calling

- Building an AI coding agent that plans development tasks and executes code changes within a sandboxed project workspace.
- Designed task-state management, tool-calling workflows, agent orchestration, and strict workspace execution boundaries.

Clean RAG — RAG Pipeline

Python | FastAPI | Document Processing | Vector Databases | Qdrant | LLMs

- Building a modular RAG system for document ingestion, text cleaning, chunking, vector retrieval, and context generation.
- Structured the application into separate API, ingestion, retrieval, and generation components for maintainability.

Backend Template — Full-Stack Backend Foundation

FastAPI | Node.js | TypeScript | MongoDB | Redis | Qdrant | Docker

- Created a modular, reusable backend architecture for AI tools and SaaS applications.
- Implemented REST APIs, authentication, database persistence, Redis-based services, vector search integration, and Docker-based development/deployment infrastructure.

EDUCATION

Institute of Technology and Management (ITM)

Bachelor of Technology (B.Tech.) in Computer Science & Engineering

July 2022 – July 2026
